Inside and outside the book

ES 007 Product Manual(The picture is for reference only and the actual object shall

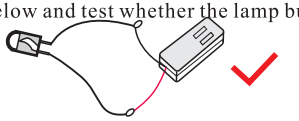

Notes before fabrication

Warm reminder

1.You can refer to the picture on the cover of the instruction of the final work for production.
2.Please prepare tools, such as utility knife, ruler, scissors, awl, tweezers, etc.
3.Please cut the material according to the template or dimensioning in order to avoid mistakes.
4.Small derivations of the material colors due to different batches subject to change without notice.
5.Children should be accompanied with their parents in production.
6.Please purchase the batteries and the appropriate battery box by yourself (AAA battery).
7.Operate according to the figures below and test whether the lamp bulb can be ON.

It is prohibited to connect the wire to both electrodes of the battery by hand.

The battery box must be connected for the test of the lamp bulb and the interface of the lamp line must be bundled with tape.

Warning: This product has no connection mode wires.
This kind of wire cannot be inserted into the output socket.
The product cannot be connected to the power sources over the recommended quantity.

Self-prepared tools

Knife

Tweezers

Ruler

Scissors

Needlework

Bolt driver

Pliers

Awl

Use instruction for glue

Alcohol glue: It is quick to dry and will have wire drawing.
It is mostly used to paste the big block, small metal, small furniture, small articles, etc.

White latex: It is slow to dry. It has no marks and pastes tightly. It is most widely applied in the pasting of transparent film, wallpaper, paper accessories, etc.

Sticker: Please tear off the protective paper like the double sided tape. It is used for electric wire interface.

Fabrication skills

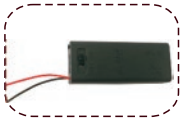

1.The white LED light power line is positive electrode and the grey is negative electrode.

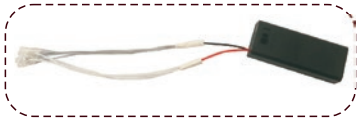

2.Please remove the electricity glue before connecting the power cord prevention.

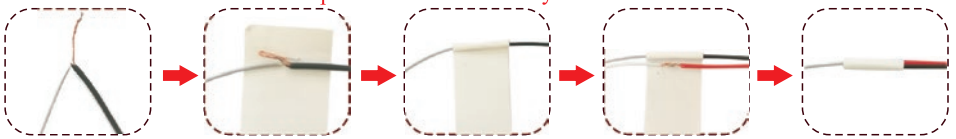

3.The red power cord of the battery box is positive electrode and the black is negative electrode.

4. Test whether all lamps can be ON before the installation of the lamp. Connect all lamp grey lines to the black line of the battery box and all white line to the red line of the battery box. Test whether all lamps can be ON.

3.Connection method of LED power line and battery box

Screw the grey power cord of the LED light, the light and the black power supply cord together. Screw the white line of the LED light and the red power cord of the battery.

Place the screwed power cord on the gummed paper as shown in the figure.

Pack the interface as shown in the figure.

Another power cord is placed and wrapped as shown in the figure. The two copper wires cannot touch each other in order to avoid the short circuit and light failure.

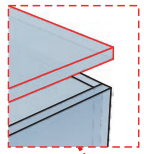

Final effect after wrapping up. Fabricate the extension line according to the procedures.

4.A small amount of glue can be pasted on the pasted position of the toothpick when pasting small objects or narrow edges.

5.We can use an awl to slightly mark the broken line when folding the paper accessories in order to facilitate the folding.

6.A ruler can be turning on the table to make the iron wire straight before production.

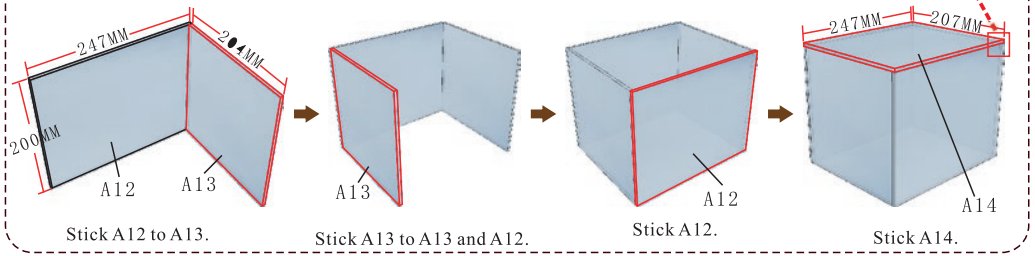

7.Wind the great circle with circular column shape, such as glue cap and wind the small circle with tongs.

Dust cover fabrication method

(Please tear off the kraft paper on the plexiglass before fabrication.)

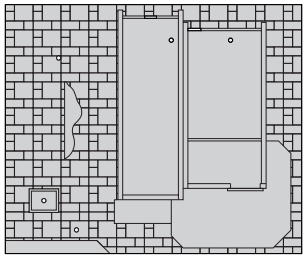

Stick A12 to A13. Stick A13 to A13 and A12. Stick A12. Stick A14.

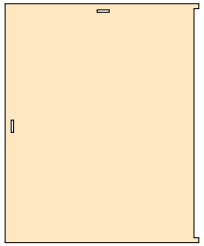

It is necessary to apply alcohol glue on the bonding edge. Follow the steps for the sticking.(It is necessary to purchase the dust cover separately.)

Warm reminder:
Please cut according to the arrangement position of the cutting template in order to avoid the insufficient materials in non accordance with the template position.

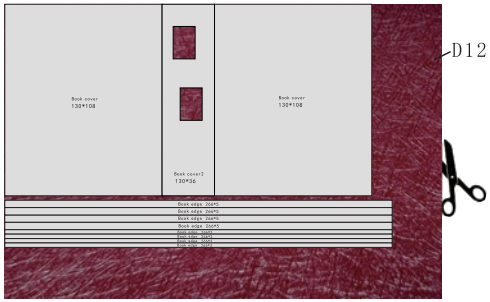

Stick the wood and printing paper, cut the with a knife when using the wood and take out the wood.

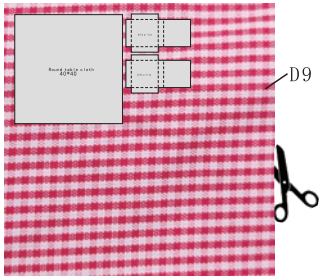

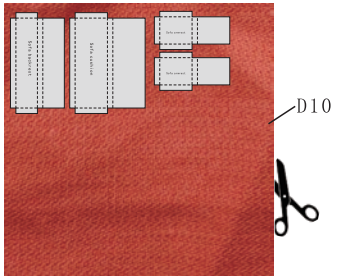

A18 Cut template paper

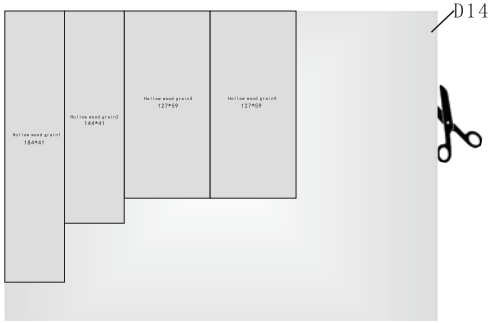

Cut D12 according to the cut template and then fabricate it.

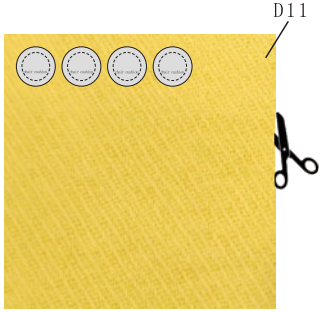

Cut D9 according to the cut template and then fabricate it.

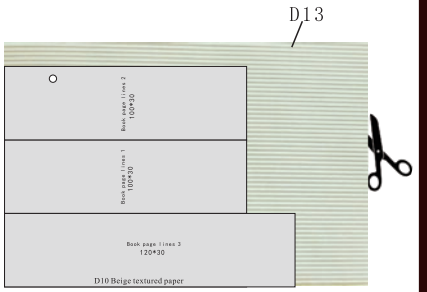

Cut D10 according to the cut template and then fabricate it.

Cut D14 according to the cut template and then fabricate it.

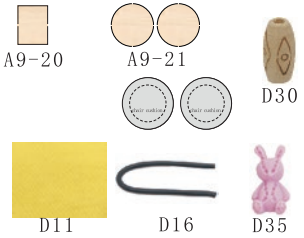

Cut D11 according to the cut template and then fabricate it.

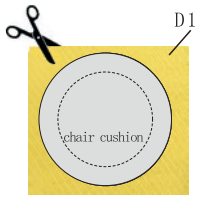

Cut D13 according to the cut template and then fabricate it.

Chair

1

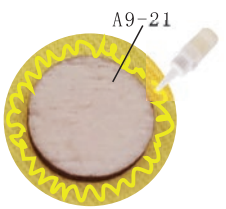

Cut D11 according to the chair cushion template.

2

3

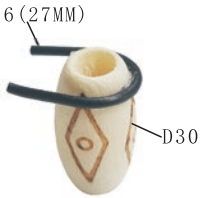

Stick A9-21 in the center of the upper part.

4

Fabricate two.

5

Bend D16 shape by relying on D30.

6

7

Stick it.

8

Bend D16 shape by relying on A9-20.

9

Bend the shape in the figure.

10

11

Stick it.

12

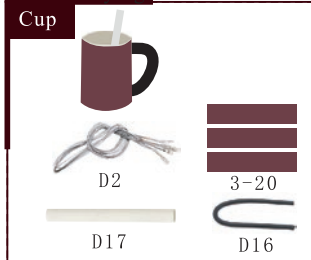

Fabricate two.

12

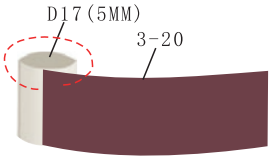

Stick D35 to another piece.

Cup

1

Wrap up one circle.

2

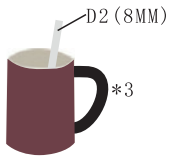

3

Stick it.

4

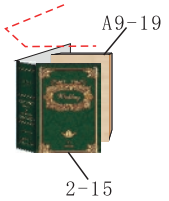

Stick it at the end of D2 and fabricate three.

Book

1

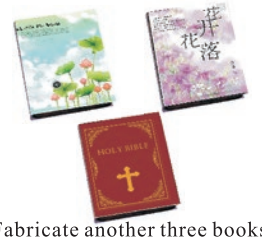

Wrap 2-15 outside A9-19.

2

3

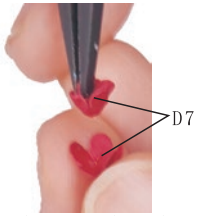

Fabricate another three books in the same way.

Vase

1

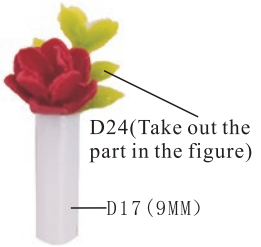

Pinch two D7 into the shape and stick them.

2

Fabricate 8 flowers for backup.

3

4

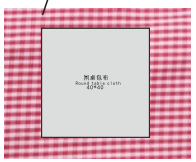

Fabricate it.

Table

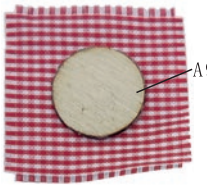

1 D9 (Round table cloth)

Cut D9 according to the template paper.

2

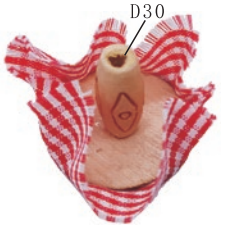

Stick A9-18 to the middle of D9.

3

Stick A9-18 edge.

4

Center and stick D30.

5

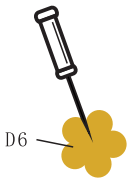

Stick it.

Plant 1

1

Punch a hole in the middle with a pair of awl or a knife.

2

Penetrate D29 in the center.

3

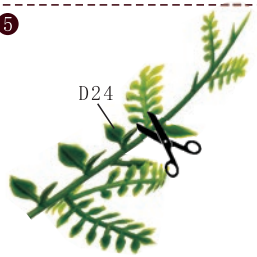

4

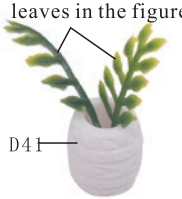

Penetrate one D6.

5

6 D24(take out the leaves in the figure)

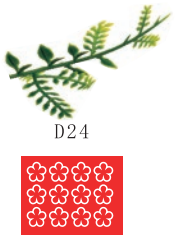

7

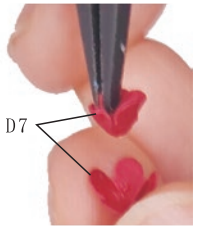

Plant 2 and 3

1

Pinch D7 shape and stick it.

2

3 D6 (Fabricate three flowers for backup.)

Fabricate D6 in the same way.

4

5 D24(Take out the leaves in the figure.)

6

Fabricate two.

7

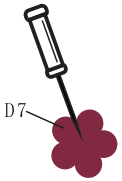

Fabricate two.

Pot culture

1

Punch a hole in the middle with a pair of awl or a knife.

2

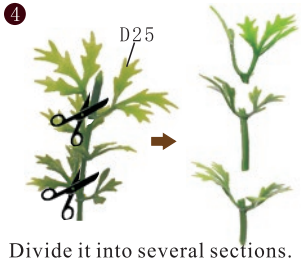

Penetrate D29 in the center.

3

Fabricate four.

4

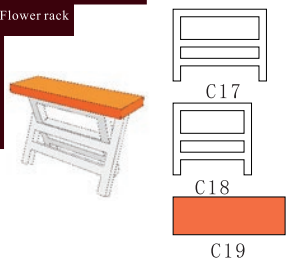

Divide it into several sections.

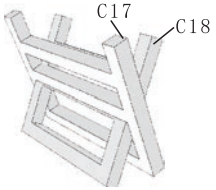

5

Flower rack

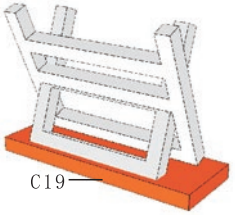

1

Overlap and stick it.

2

3

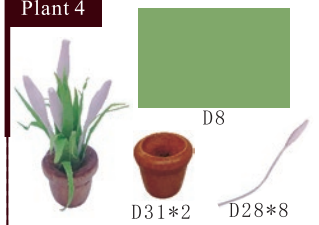

4

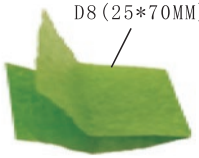

Stick the fabricated plants.

Plant 4

1

Fold D8 twice.

2

Cut it.

3

Spread it.

4

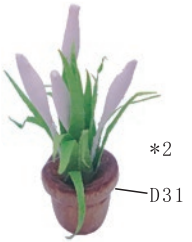

Wrap it up in sequence.

5

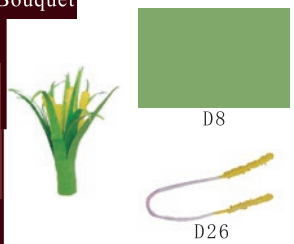

6

Fabricate two.

Bouquet

1

2

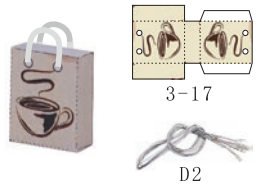

3

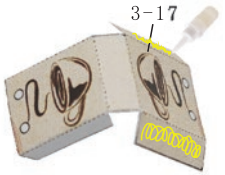

Fabricate two.

Handbag

1

Fold 3-17 along the folding line and then stick it.

Cake

1

Cut it into slices.

2

Stick it to D48 and fabricate two.

2

3

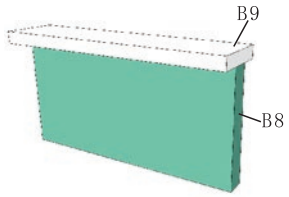

Take D2 white line end and stick it.

Cabinet

1

Stick it.

2

Stick the fabricated accessories.

Signboard

1

2

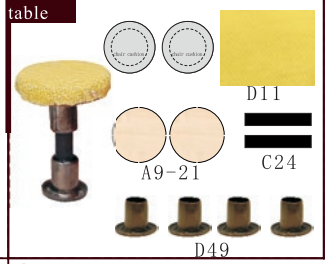

1

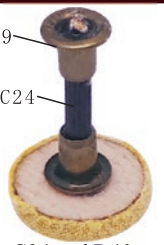

Stick it.

② 

Round table

① (Refer to Page 6.)

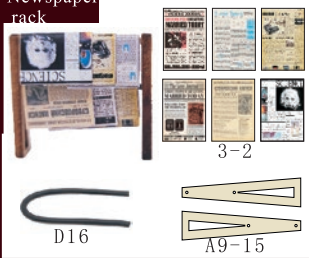

② 

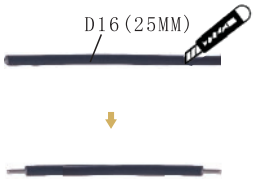

③ 

Stick C24 and D49.

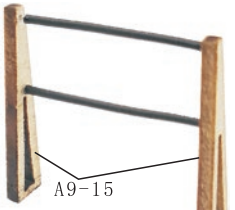

④ 

Fabricate two.

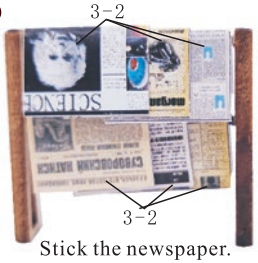

Newspaper rack

① 

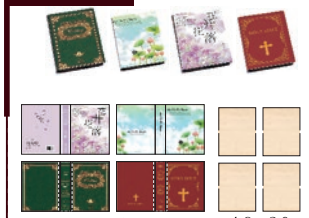

Cut D16 length and peel the iron wire at both ends.

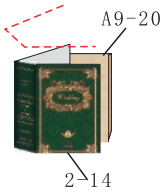

② 

Penetrate D16 both ends to the hole in the middle.

③ 

Stick the newspaper.

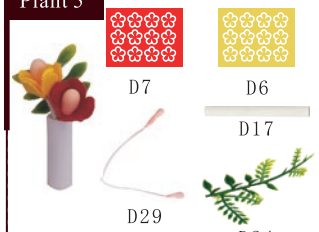

Small book

① 

Wrap up 2-14 outside A9-20.

② 

③ 
Fabricate three books in the same way.

Plant 5

① 

② 

③ 
Fabricate it.

④ 

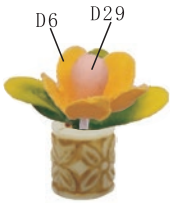

⑤ D24(take out the leaves)

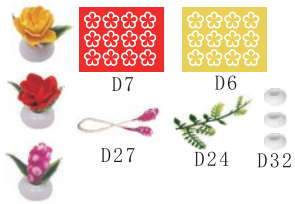

Plant 6

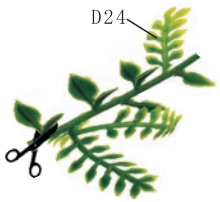

① 

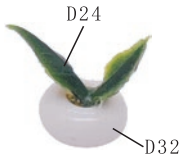

Use the lower part.

② 

③ 

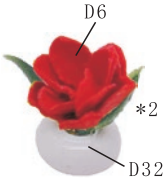

Plant 7, 8 and 9

① 

② 

③ 

Plant 7

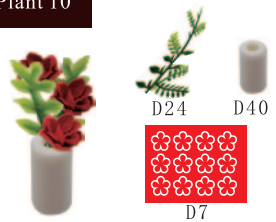

④ 

Plant 8

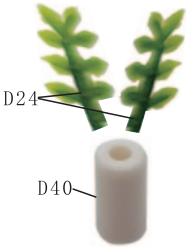

⑤ D27(intercept the end)

Plant 9

Plant 10

1

2

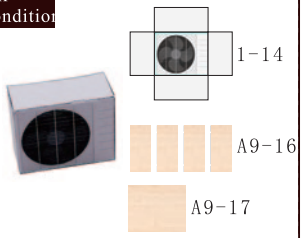

Stick and fabricate it.

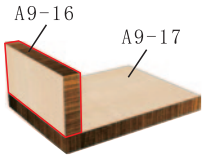

3

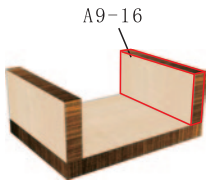

Air conditio

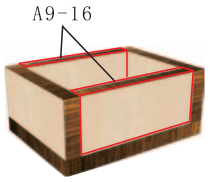

1

2

3

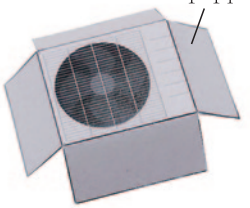

Stick the wood according to the numbers.

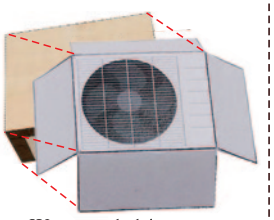

4

5

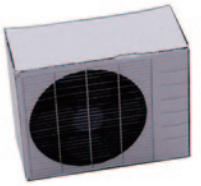

6

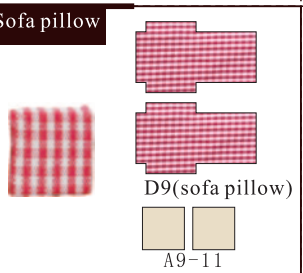

Wrap up 1-14 outside the wood.

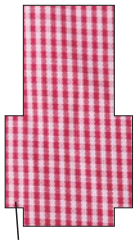

7

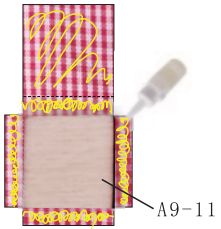

Sofa pillow

1

2

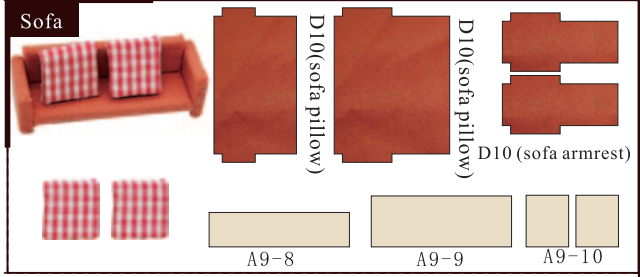

Stick A9-11 and wrap it up.

3

Sofa

1

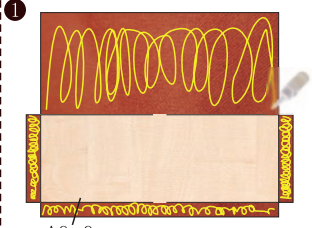

Stick and wrap up A9-8.

2

1

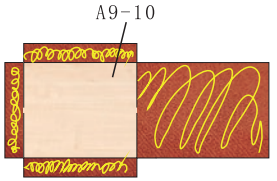

Stick and wrap up A9-9.

2

1

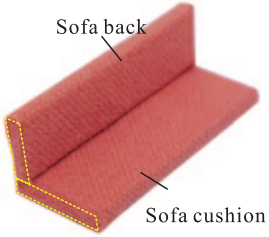

Stick and wrap up A9-10.

2

1

2

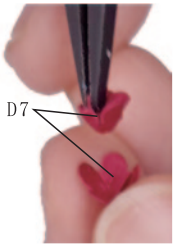

3

Plant 11

1

2

3

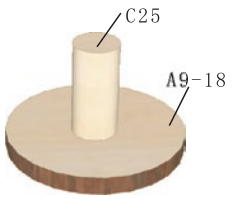

4

Round table

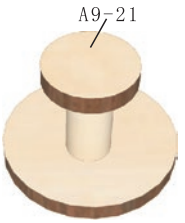

1

Center and stick it.

2

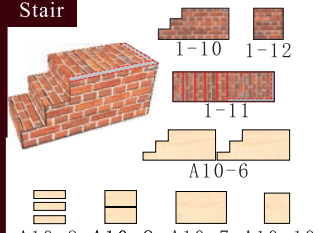

Center and stick it.

3

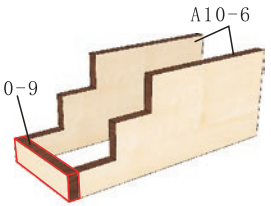

Stick the fabricated accessories.

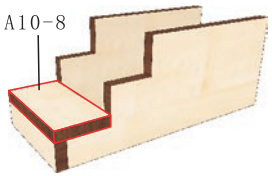

Stair

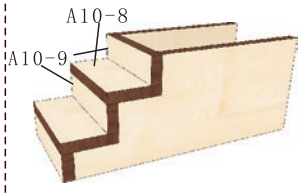

1

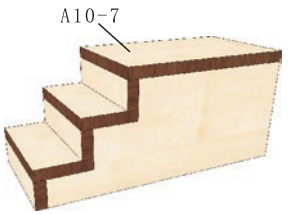

2

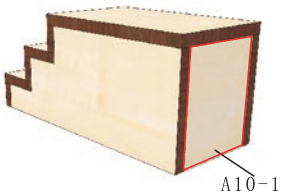

3

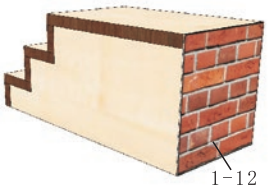

4

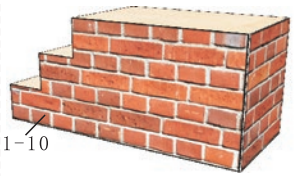

5

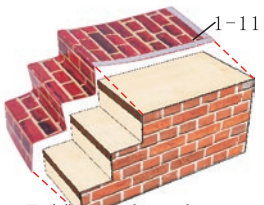

6

7

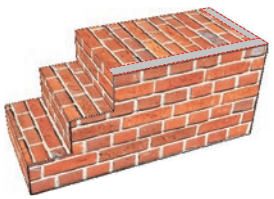

8

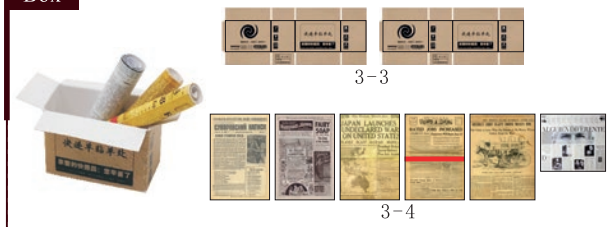

Fold 1-11 along the folding line.

9

Stick it.

Box

1

2

3

4

5

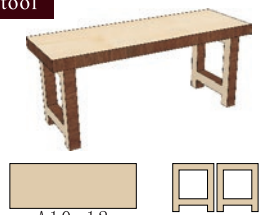

Take out three 3-4 and roll them up.

6

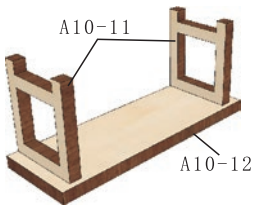

Fabricate two.

Stool

1

Stick the wood according to the numbers.

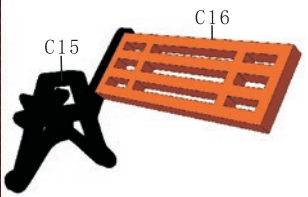

2

Roadside bench

1

2

Overall Assembly

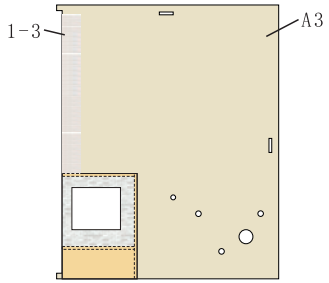

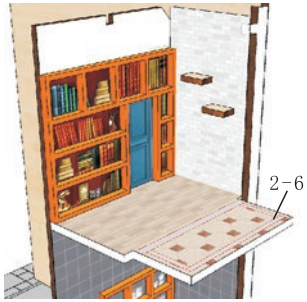

Turn over A1 and then stick B10.

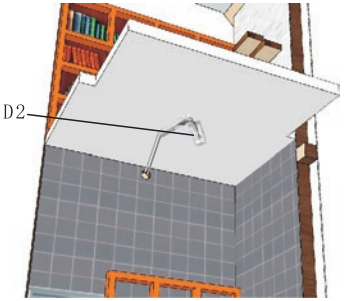

Apply white latex to A3 evenly, scratch the white latex evenly with wood, cut 1-1 and stick it to A3 hollow part, then stick A3, pad a piece of paper and scratch it flat with a straight ruler or wood(Stick the paper accessory to the wood panel in the same way. We will not repeat it in the following.)

Turn over A3 and then stick 1-3.

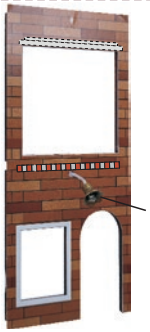

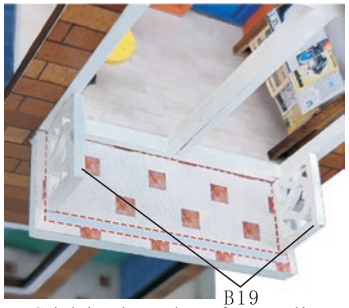

Stick it along the reference line.

Stick it along the reference line.

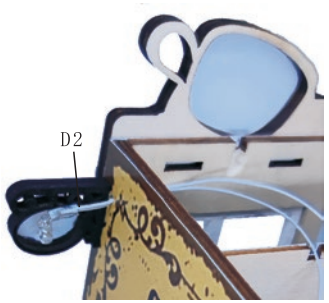

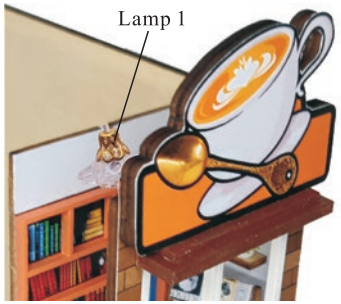

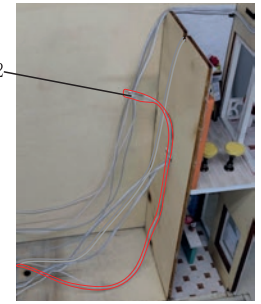

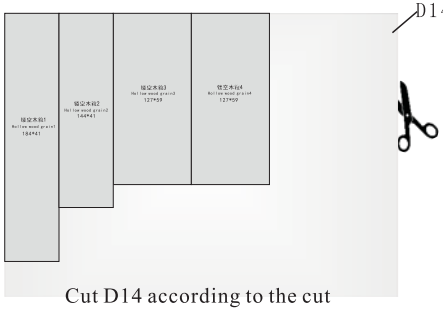

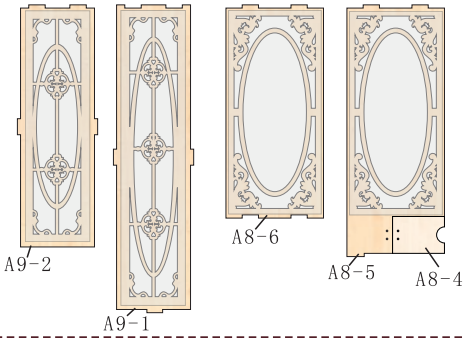

Stick D2 and then arrange the lamp line.

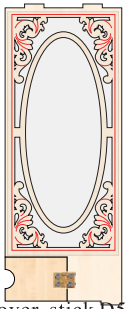

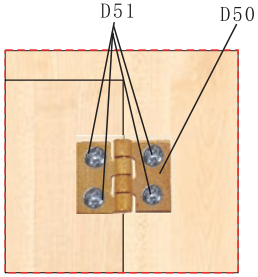

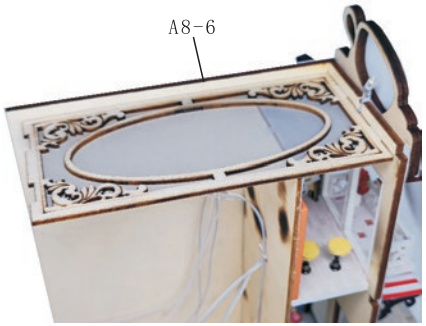

Cut D14 according to the cut template and then fabricate it.

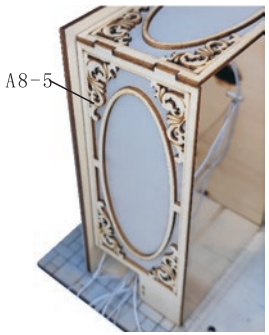

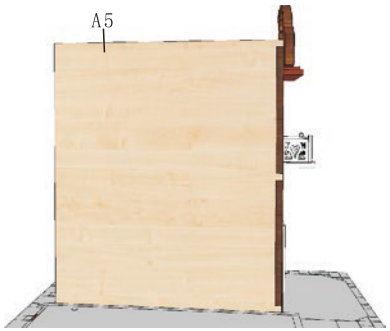

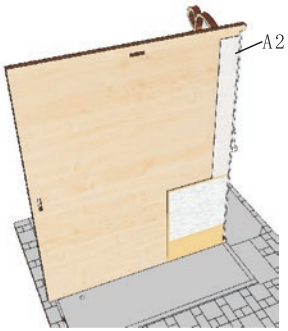

Turn it over, stick D51 hole to hole and then fasten the screw.

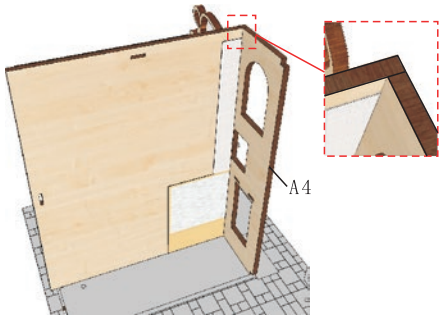

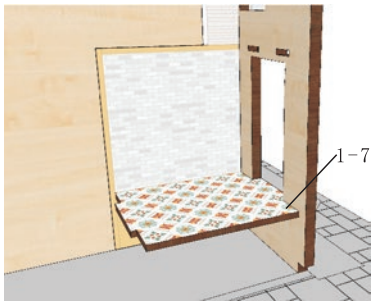

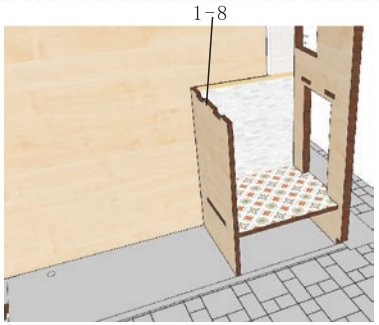

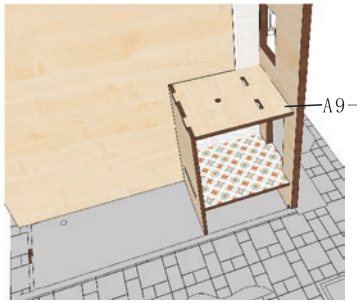

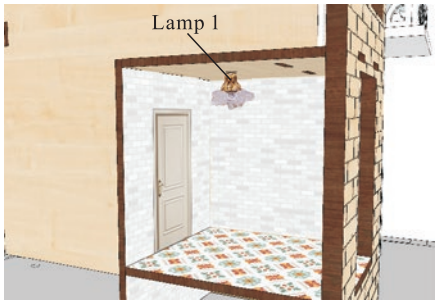

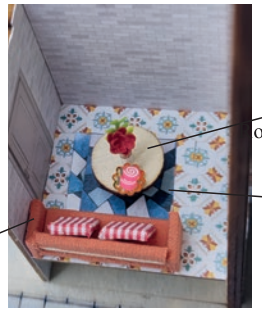

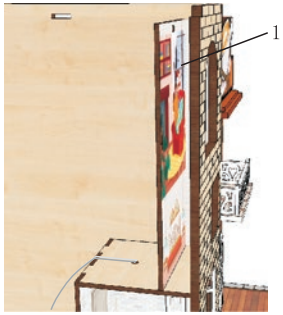

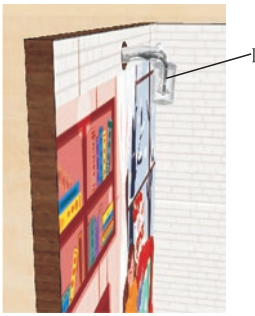

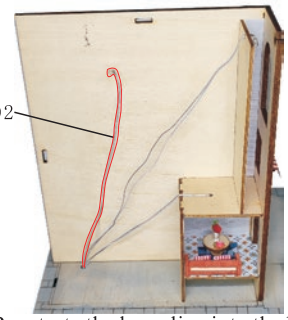

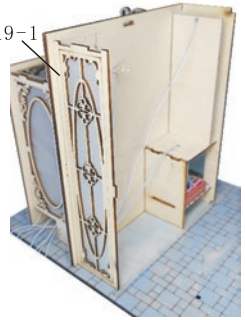

Stick 1-13 and then stick sofa and round table.

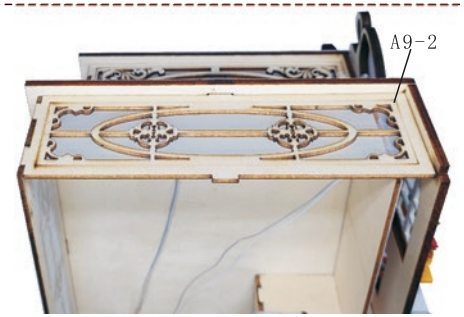

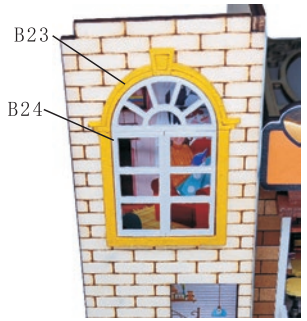

Penetrate the lamp line into the hole.

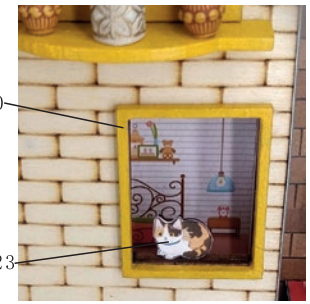

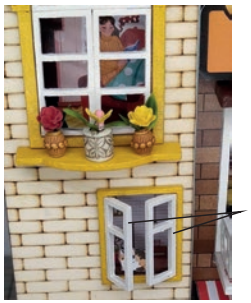

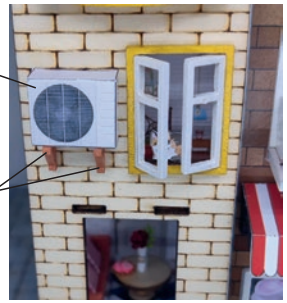

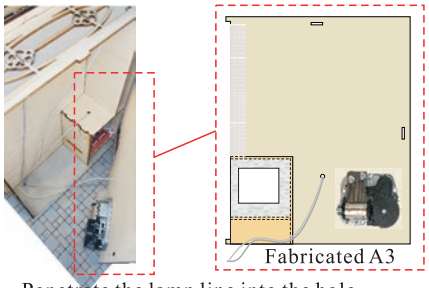

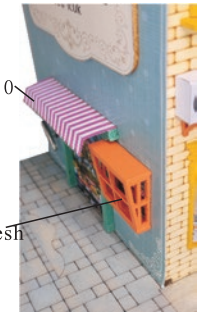

Penetrate the lamp line into the hole
and then stick the fabricated A3.

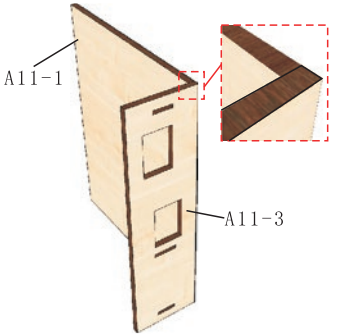

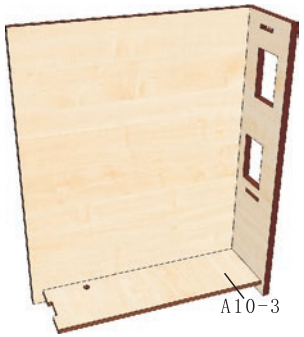

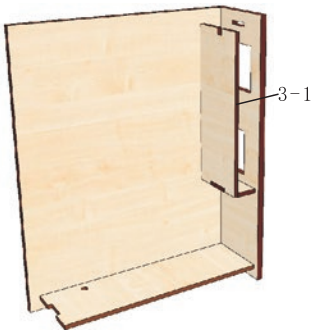

Apply white latex to the slot and then spray D19.

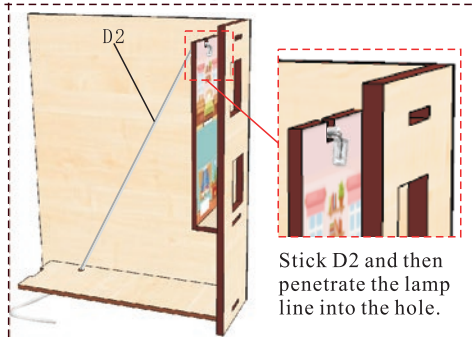

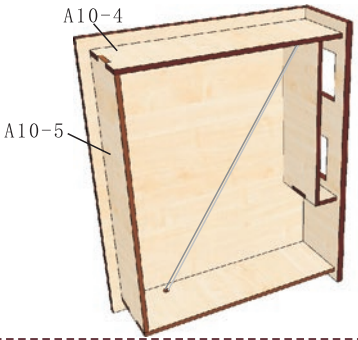

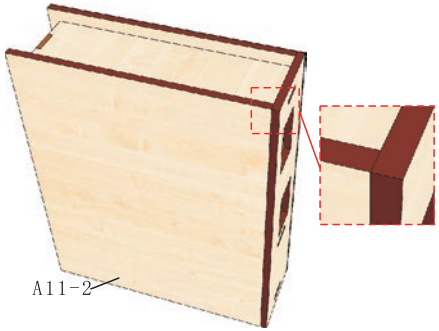

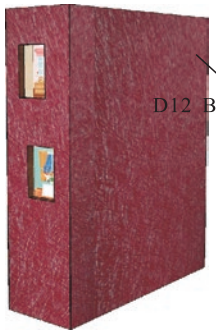

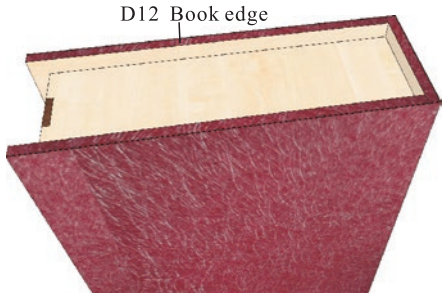

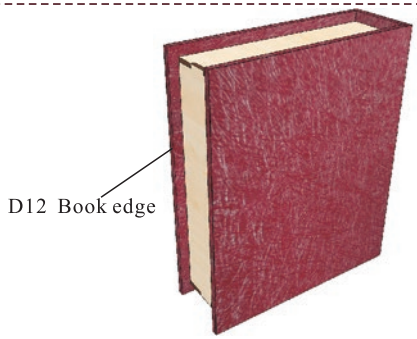

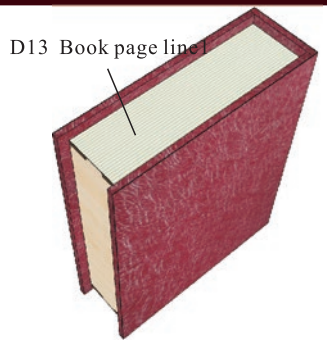

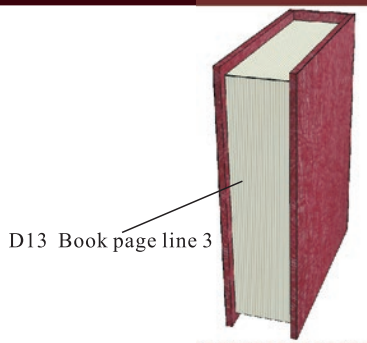

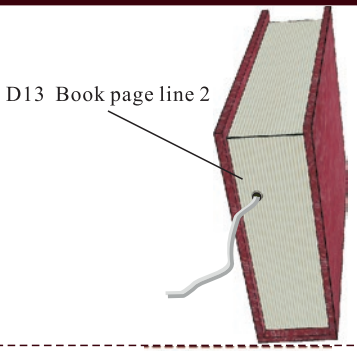

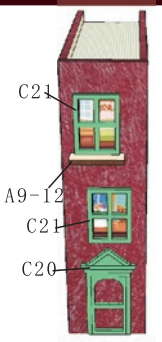

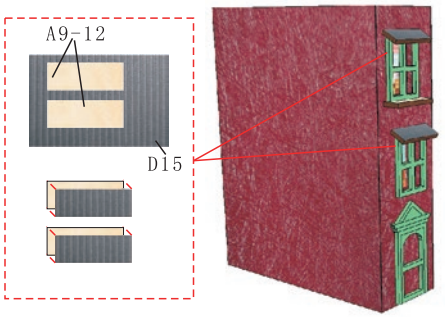

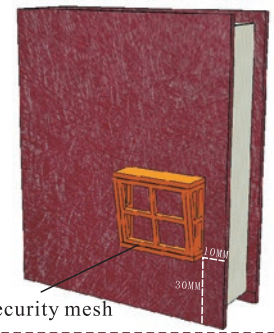

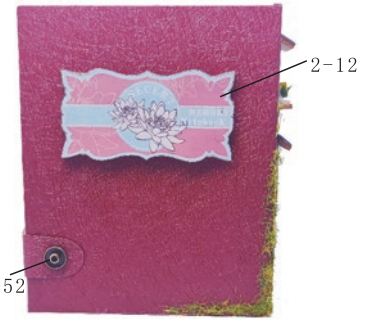

Apply white latex as shown in the figure.

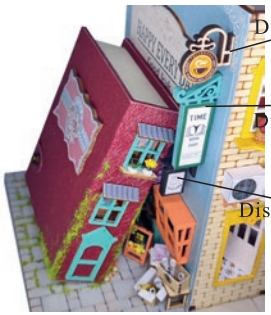

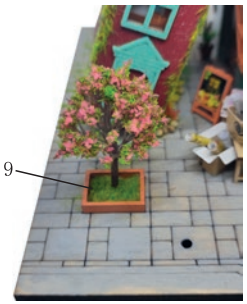

Penetrate the lamp line at the bottom to the hole.

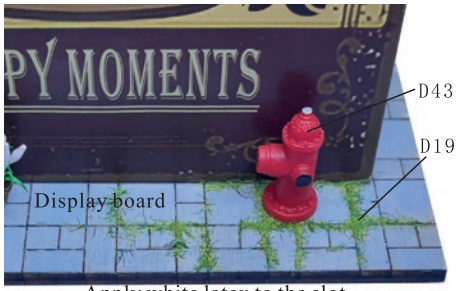

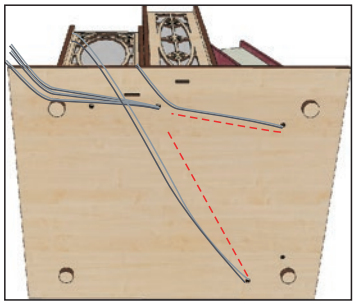

Plant 1

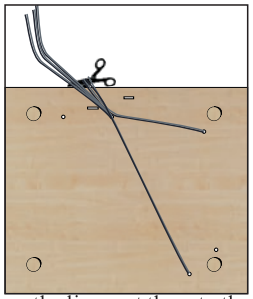

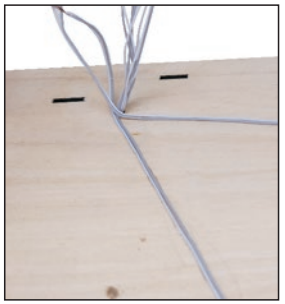

Apply white latex to the slot, spray D19 and then stick D43.

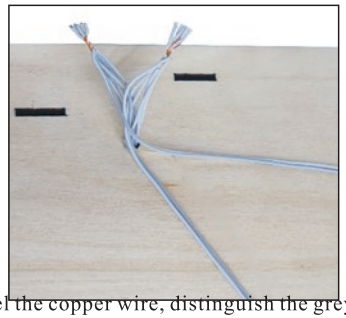

Bottom view

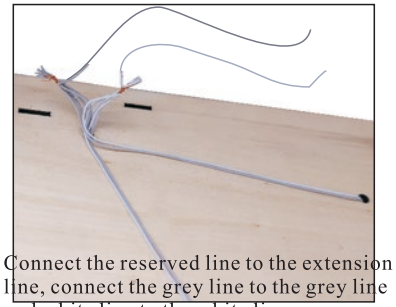

Arrange the line, cut them to the same length and reserve the rest for backup.

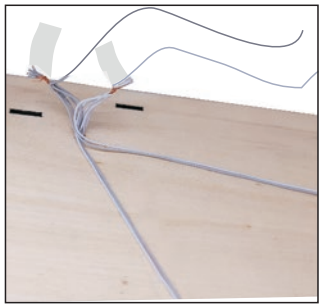

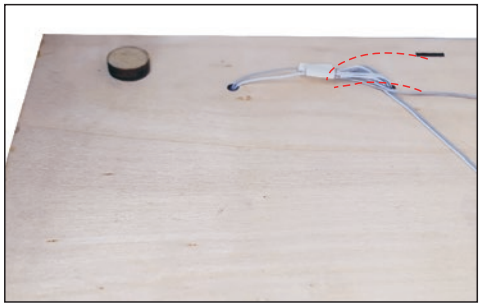

Peel the copper wire, distinguish the grey line and white line and then twist them together.

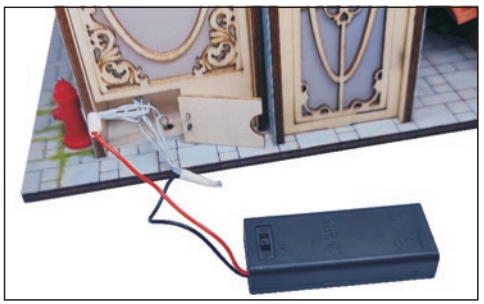

Connect the reserved line to the extension line, connect the grey line to the grey line and white line to the white line.

Wrap it up with D3.

Penetrate the extension line to the hole.

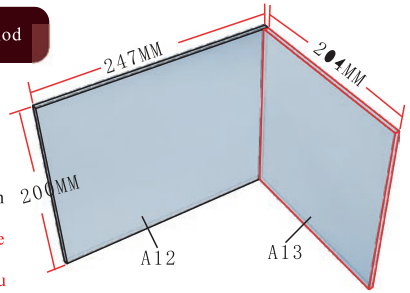

Cut the line into the same length, peel the copper wire, distinguish the grey line and white line, twist them together, connect it to the battery box, connect the black line to the grey line, red line to the white line and wrap it up with F3.

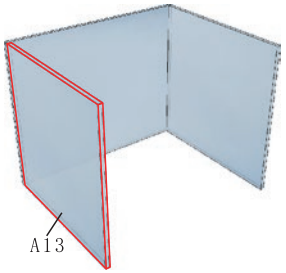

Dust cover fabrication method

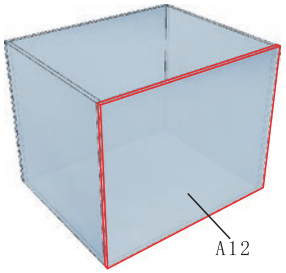

Please tear off the kraft paper on the plexiglass before fabrication.(Please purchase the plexiglass if there is no. You can neglect this procedure if you do not purchase the plexiglass .)

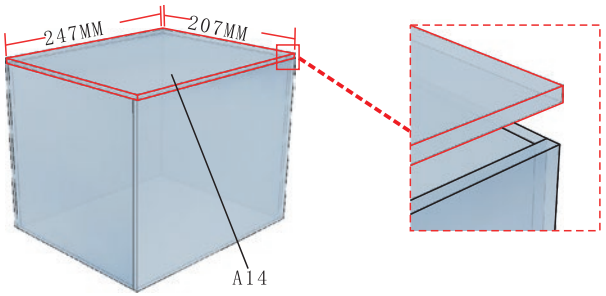

Stick A12 to A13.

Stick A13 to A13 and A12.

Stick A12.

Stick A14.

Cover the dust cover.
